

SaniZone

Clean the air, as well as surfaces

An innovative solution designed to improve the hygiene conditions of your facility. SaniZone targets bacteria, viruses, mould, fumes, odours and other impurities in the air and on surfaces. Ideal for heavy traffic areas.

By purifying your air, you benefit from:

A Safe Environment

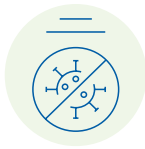

Innovative technology treats air with a specialised UV light. Positive and negative ions and oxygen molecules are released into the air, destroying micro organisms.

Unparalleled Performance

SaniZone continuously treats the air and surfaces while removing malodours. SaniZone targets impurities at their source, as opposed to traditional masking techniques.

Proven Results

SaniZone is third party tested and proven effective against illness-causing virus and bacteria. SaniZone's mix of technologies provide the most effective way to increase air and surface protection.

Product Overview

Continuous Protection

- 24/7 air and surface treatment for spaces of any size
- SaniZone reaches areas that no other cleaning technology can
- Increases customer & employee satisfaction

Environmentally Friendly

SaniZone is free of harsh chemicals reducing environmental impact.

Is more effective than UV light air purifiers and ozone generators.

Options & Specifications

Dimensions:	15.78" x 35.82" x 12.24" (H x W x D)
Input Voltage:	100-240 VAC
Sustainability:	Unit recycled at end of useful life
Colour:	Grey

Let us do the dirty work so you don't have to

Citron Certified Hygiene Technicians maintain each system on a pre-determined schedule.
