

EcoBreeze Smart

The only air purification system you'll want

Eliminates the most offensive malodours effectively,
safely and sustainably

By installing EcoBreeze Smart in your washrooms, you will benefit from:

A Positive Impression Every Time

- Scientifically proven to reduce 95% of the most challenging malodours and indoor pollutants with no or little ventilation.
- Can be used with or without scent, with four fragrances to choose from.
- Makes every washroom visit a pleasant one for your customers, employees, or visitors that will forge a positive reputation for your organization.

Safe Air, Healthy Area

- Patented design ensures optimum, continuous performance without the use of ozone, aerosols, biocides, and ionizers.
- One-of-a-kind patented technology reduces volatile organic compounds (VOCs) in the air.
- Purified air reduces airborne pollutants, bacteria and viruses that spread illness, thereby creating a healthy organization with less absenteeism.

How it purifies the air

EcoBreeze Smart has a patented design that ensures effective and continuous air purification and enhancement all day and everyday.

1 Extract:

Stale, malodorous air is drawn through an electrostatic pre-filter removing large particles such as dust, hair and pollen - commonly known as aeroallergens thus reducing indoor pollution and malodours.

2 Purify:

The air then passes through the activated, honeycomb carbon filter which traps toxins, pathogens and odours.

3 Enhance:

Fresh, clean air then flows over a perfumed wick delivering a passive, gentle fragrance throughout the area (if a fragrance option is desired).

The unique release and refiltration mechanism ensures fragrance chemicals are filtered out, maintains safe air continuously and creates a safe space for all.

Ideal Placement

Position top of the unit 2 meters from the floor.

For optimum efficiency units should be installed:

Male washrooms - directly above urinals

Female washrooms - by cubicle and entrance door

Disabled / Baby Change - directly above nappy bin

How it saves the planet

EcoBreeze Smart is an environmentally friendly air purification and fragrance system.

- ✓ No batteries, aerosols, UV lights or ozone.
- ✓ Pre-filters are washable and reusable.
- ✓ Carbon filters are non-toxic and sustainably sourced from coconut shell.
- ✓ Fragrance vessels are made of HDPE (High-Density Polyethylene) which is a thermoplastic polymer made from petroleum. It has a high strength-to-density ratio, cost-effective and fully recyclable.
- ✓ All packaging is made from recycled materials.

Options & Specifications

Dimensions:	8.7" x 7.1" x 2.4" (H x W x D)
Fragrance Options:	Sea Spray, Tango Max, Tropical Heaven or Green Tea
Power:	12W (12V, 1A)
Net Weight:	670g
Colour:	Silver

Let us do the dirty work so you don't have to

Citron Certified Hygiene Technicians maintain each system on a pre-determined schedule.
