

EcoCard

Naturally Effective

EcoCard is our exclusive, non-liquid disposal agent designed specifically to treat menstrual waste. This unique disinfectant treats menstrual waste with a penetrating vapour action.

Neutralize odours and sanitize waste

A Safe Solution

Created from natural actives, EcoCard does not contain or produce any hazardous chemicals.

Eliminates Malodour

The natural plant extracts and essential oils penetrate the disposal unit, around, between and through the waste, neutralizing odours.

Reliable, Hassle-Free Service

Our expert technicians do the dirty work so you don't have to.

Menstrual Hygiene Disposal

Product Overview

Key Features and Benefits

- ✓ Powerful natural, vapour phase germicide disinfects all contents and surfaces, including the lid.
- ✓ Product testing demonstrates extremely high level of efficacy against broad range of pathogenic bacteria.
- ✓ Ecologically sound - Non-toxic and natural in origin replacing the use of noxious and hazardous chemicals. 100% Biodegradable card.
- ✓ Protects users, service operators and business reputation.

How Does EcoCard Work?

EcoCard is based on our patented, natural vapour technology and tested to ensure sanitising activity between service calls.

The active components are based on a unique blend of volatile, natural plant extracts. The first noticeable effect is the immediate fragrance action which creates a pleasant aroma in the surrounding room.

The natural anti-microbial vapours then permeate the whole unit and continue to be effective even when the waste unit is full.

The totally dry system has been specifically developed to release the natural germicide in a controlled manner to ensure total natural anti-microbial coverage.

Let us do the dirty work so you don't have to

Citron Hygiene Certified Technicians maintain each system on a pre-determined schedule.

All sanitary waste is removed discreetly from your premises.
